

DR SHARIF KHAN

BDS (EDIN.) M.CLIN.DENT. (LOND)

The Art of Digital Dentistry

SYNOPSIS

Digital workflows are transforming restorative and implant dentistry, bringing new levels of speed, accuracy, safety and predictability. In this session, Dr Sharif Khan showcases the technologies reshaping modern practice: 3D face scanning for optimal aesthetics, the rapid and accurate digital fabrication of complete dentures, the combined use of intraoral scanning, planning software and the X-Guide live navigated surgery system in implant placement, and FastMap photogrammetry for exceptional accuracy in implant bridge fabrication.

Drawing on his interest in managing the terminal dentition, Sharif connects these technologies into a single, coherent workflow that delivers better-fitting, more comfortable results for patients. He qualified from Edinburgh University, trained in implantology at the Eastman Dental Institute, UCL, and gained a Master of Clinical Dentistry in Fixed and Removable Prosthodontics from King's College London in 2003. He has trained in NobelGuide in Lisbon, X-Guide navigated surgery in Zurich, and digital implant dentistry at Studio Pozzi in Rome.

EVENT DETAILS

DATE Tuesday 29 September 2026

TIME 6.00pm - Trade / Sponsors registration
7.00pm - Dinner
8.00pm - Lecture

ADDRESS Mercure Nottingham Sherwood,
296 Mansfield Road, Nottingham, NG5 2BT
